

HIMANI SALUNKHE

In  himanisalunkhe0401@gmail.com in  in/himani-s-841397260

SUMMARY

Final year Computer Engineering student with expertise in AI and Python, passionate about building intelligent systems. Developed four industry-oriented projects, including AI-powered security threat detection, medical image analysis, twitter data analysis. Strong problem-solving abilities, a keen interest in innovation, and a commitment to learning emerging technologies. Seeking opportunities to apply technical expertise in real-world applications and contribute to impactful projects.

EXPERIENCE

Python Intern

Motion Cut
2025

February 2025 - March

- Developed Python-based projects focusing on automation and AI

PROJECT

AI-Powered Security Threat Detection

Built a system to detect security threats using AI-powered anomaly detection.

Technologies Used: Python, Machine Learning, Cyber security Analytics

AI-Powered Medical Image Analysis

Developed a deep learning model for analyzing and classifying medical images for disease detection.

Technologies Used: Python, Pandas

AI-Powered Autonomous Navigation System

Designed an AI-based navigation system for autonomous vehicles using deep learning and computer vision.

Technologies Used: Python, OpenCV, Tensor Flow

Twitter Data Analysis (Minor Project)

Analyzed Twitter dataset to study user sentiment and trending topics.

Performed data cleaning and visualization using Python libraries.

Generated insights from social media data through exploratory data analysis.

Technologies Used: Python, Pandas, Matplotlib

EDUCATION

COMPUTER SCIENCE ENGINEERING

Ajeenkya DY Patil School of engineering pune • Pune, India • 2026 • 8.85

HSC

Kendriya vidyalaya 9BRD pune • 2021 • 84.2%

SSC

Kendriya vidyalaya BRD pune • Pune, India • 2019 • 81%

SKILLS

Soft skills: Problem-Solving, Analytical Thinking, Project Management, Team Collaboration .

Technical skills: Python, Machine Learning ,Deep Learning ,Pandas ,NumPy, Matplotlib, Data Visualization, SQL / MySQL, Data Analysis, Data Preprocessing, Scikit-learn, TensorFlow , Jupyter Notebook
